

# Webinar #4

## The responder's toolbox - Part 1: at sea response techniques

18 November 2020 - 2:00 pm GMT

### Presentation #1: at-sea response techniques, strengths and limits

Lucy Short

Lucy Short has a background in coastal engineering, holding a Master's and undergraduate degree. She currently works as a Principal Consultant based in Southampton providing emergency preparedness and response readiness services globally.

### Presentation #2: case study - oil spill after collision off Cap Corse (France)

Dr Annabelle Nicolas-Kopec

Dr Annabelle Nicolas-Kopec is a chemist and a Senior Technical Adviser at ITOPF. Since joining ITOPF 10 years ago, she has attended many incidents worldwide, providing expertise in oil and chemical spill response in areas of high sensitivities.

### Presentation #3: decision-making processes - NEBA and SIMA

Peter Taylor

Peter Taylor spent 6 years in environmental research and consultancy, prior to specializing in oil spill preparedness and response activities. He has been involved in over 450 oil spill related projects (including oil spill contingency planning, training and the development of simulation exercises) in 50 countries.
