

A stylized map of West, Central, and Southern Africa is shown in a bright yellow color against a dark blue background. The map includes the outlines of the continents and individual countries. In the top right corner, there are three logos: the IMO logo (International Maritime Organization), the GIWACAF logo (Global Initiative for West, Central and Southern Africa), and the ipieca logo (International Petroleum Environment Watch).

Global Initiative for West, Central and Southern Africa

Strengthening capacities for preparedness and response to oil spills

A contribution to a better protection of the marine environment in the region

GI WACAF second webinar series

Webinar #2: waste management in case of an oil spill

Chloé Gondo
GI WACAF Project Coordinator

26 May 2021

The Global Initiative for West, Central and Southern Africa (GI WACAF)

- **Launch of the Project in 2006** in the framework of the Global Initiative (GI) launched in 1996

- **Cooperation between the industry and governments** in line with the **OPRC 90 Convention**

- **Objective:** enhance the capacity of 22 partner countries to prepare for and respond to oil spills, so that they can better protect their marine and coastal environment and communities

- **Activities:**

- National or sub-regional workshops
- Trainings (tailored to the needs)
- Exercises (table-top and deployment)
- Biennial conferences
- Technical assistance

In a nutshell

OPRC 90 convention

Encourages partner countries to ratify and implement international conventions from IMO and other UN bodies

A joint endeavour of the public and private sectors to manage oil spill risks and mitigate associated impacts

Supports 22 African partner countries in the development and implementation of sub-regional and national oil spill preparedness and response systems

Encourages better communication and collaboration between governments and industry

Organizes workshops, training courses and exercises

Maintains a constant liaison with partner countries and the industry to provide tailored capacitybuilding solutions

GIWACAF

GI WACAF second webinar series

Building on season #1 delivered in June-December 2020, this new series of webinars covers specific topics of oil spill preparedness and response

Webinar #2: waste management in case of an oil spill

Objectives:

- Get an overview of the **different aspects and phases of waste management** following a marine oil spill;
- Understand the interdependence between clean-up strategies and waste minimization and management, and of the **importance for decision makers and operational responders to plan in the early stages to control and manage waste** during and after shoreline clean-up operations; and
- Understand the **importance to have waste management policy and strategy in place beforehand** as a vital component of any oil spill contingency plan.

Webinar #2: waste management in case of an oil spill

Speaker:

Stéphane Grenon
Principal, Managing Director
TRIOX Environmental Emergencies

Presentations:

Presentation #1: general principles and different types of waste

Presentation #2: the different phases in the cycle of waste management and the importance of planning and inclusion in the NOSCP

Thank you for your attention!
