

## GI WACAF webinar series - Season #2

### Webinar #3: the use of dispersants in case of an oil spill in the marine environment

21 June 2021 - 2:00 pm GMT+1

#### Presentation #1: what are dispersants and how to use them?

Ken Church

Ken Church currently works within the OSRL Aberdeen team, maintaining membership relations, delivering training and providing Technical Advice to OSRL members. Prior to joining the Aberdeen office, Ken worked in the Southampton operations department as a Duty Manager. In his role as Duty Manager Ken managed the OSRL response to spills in the UKCS and international locations. Ken has delivered oil spill response, training and exercises to many operators in an international setting.

#### Presentation #2: example of the good use of dispersants as part of oil spill response

Justina Lee

Justina Lee has a decade of experience working within the oil spill response industry. She has previously operated within an OSRO, developing planning and preparedness capabilities of operators and governments. She spent 5 years in the Middle East helping to build the OSR regional capacity. Justina now works as the Environmental Specialist for the OSEC Team, Shell. She is the focal point for all environmental related preparedness and response support.

#### Presentation #3: case study of the South African dispersant policy

Feroza Albertus

Feroza Albertus has been involved in oil spill response in South Africa for close to fifteen years. As an official with the Department of Environmental Affairs she has played a major role in a number of pollution response operations and has been responsible for ensuring that the country maintains its preparedness through oil spill training, exercises and contingency planning. She has been instrumental in the progress made in improving the country's approach to oil spill response as a key member of the Operation Phakisa Initiative B1 Working Group and Incident Management Organisation Committee.
