

Presentation #1: Overview of oiled wildlife response

Christophe Blazy holds a Master's Degree in Marine Biology and worked for different marine ecology research centres in the Mediterranean where he supported scientific projects related to the monitoring, evaluation and ecological restoration of marine biodiversity for conservation purposes. Recently, Christophe joined Sea Alarm as Technical Adviser where he helps develop/deliver trainings, exercises and workshops for authorities, industries and NGOs on Oiled Wildlife Preparedness and Response related topics.

Presentation #2: Wildlife preparedness and response challenges in Africa: a case study of Namibia and South Africa

Nicky Stander is a biologist by training and is a passionate advocate for wildlife conservation, animal welfare and ethics. She has spent the last 11+ years overseeing the rescue, rehabilitation and release of seabirds at the Southern African Foundation for the Conservation of Coastal Birds (SANCCOB) and has responded to several oiled wildlife incidents along the South African coast.
